## Construction work on Highway 10 and townsite roads

*Riding Mountain National Park*

**Wasagaming, Manitoba, June 22, 2020** – Parks Canada would like to advise travelers that starting June 24, 2020, construction work will take place on Highway 10 through Riding Mountain National Park, from kilometre 17 to 25, along with the following roads in the townsite of Wasagaming:

- Ta-Wa-Pit Drive (from Highway 10 to Balsam Street)
- Columbine Street (from Highway 10 to Wasagaming Drive)
- Wasagaming Drive (from Highway 10 to Mooswa Drive)

A micro sealant is being applied to the recently paved road to prolong the life of the asphalt - the work is expected to take five days, weather depending. This application is part of a larger federal infrastructure road renewal project which will result in improved, safer traveling experience for visitors.

Public safety is a priority for Parks Canada. Visitors travelling through the park should be prepared for single-lane alternating traffic, speed reductions to 60 km/hour in the construction zone with traffic control personnel on site, and occasional delays of up to 15 minutes. Within the townsite, we ask visitors to follow construction signs and traffic controllers at the scene and to expect limited access to some roads while the application is completed. Hours of work are sunrise to sunset.

Parks Canada is completing this important infrastructure work to ensure safe, high-quality experiences for visitors by improving heritage, visitor, waterway, and highway assets located within national historic sites, national parks, and national marine conservation areas.

### **Please note:**

- Parks Canada is following advice from public health experts and implementing measures to support Canada's efforts to limit the spread of the novel coronavirus (COVID-19) and reduce the risks to Canadians, visitors, Parks Canada team members, and contractors working at our places.
- Parks Canada's construction projects are considered part of the Agency's critical services to the public. Most scheduled construction activities are proceeding as planned, but are subject to change due to the evolving situation related to COVID-19. Parks Canada will continue to communicate all developments to the public.

For questions or concerns, or to receive email updates regarding this project, please contact us at [jodi.duhard@canada.ca](mailto:jodi.duhard@canada.ca).
